1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6,23-26,27,30,31,35,40-45,66-71,99,100,101,102 are rejected under 35 U.S.C. 102(b) as being anticipated by Montero et al.

Montero et al discloses system for dissipating heat generated by an electronic component, system comprising controllable cooling element and a control system for controlling cooling element, wherein control system adjusts a speed of operation of cooling element in response to variation in power consumption of electronic component, see page 1 col 1 paragraph 6, page 1 col 2 paragraph 8, page 2 col2 paragraph <sup>26-</sup>~~28~~, page 3 col 2 paragraph 37, page 4 col 1 paragraph 39.

3. Claims 7-22,28,29,32-34,36,37,38,39,46-65,72-98,103 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Examiner wants to point out with respect to some of applicant's arguments that with increased power consumption, increased heat is generated, so Montero is monitoring power consumption and adjusting fan speed based on power consumption.
